

HV-2E Fume Extraction system

A fume extraction system with two extraction arms that is both portable and compact. The main unit features strong fan performance with a pre-filter and an efficient standard filter, while being on lockable casters for easy maneuverability by one person. The internal pump system utilizes a quiet brushless, maintenance free centrifugal fan motor that efficiently removes fumes from the desired workspaces, while keeping noise to a minimum. The two 7ft. long flexible arms with 6.5" funnels can reach most work areas with ease and make it easy to reach workstations even if far apart from each other.

- Internal Pump: brushless, maintenance free centrifugal fan motor
- Air Flow: 175m³/hr. per 75mm arm

- Noise Level: <50dB
- Voltage: 110V /220V
- Dimensions: 17" x 13" x 12"
